Device description

AT-PS/G/3/001 has been designed to remotely control the starters or other units which require such a type of control. It has been made as per usage in underground mining. It does meet the ATEX standards confirmed with the certificate. Its weight of less than 3 kg makes it light and easy to handle. As per standard it is equipped with one cable glance. The emergency stop button as per request can be equipped with key relase mechanism to prevent the unathorised usage.

AT-PS/G/3/001 is made of galvanized and powder coated steel to make it resistant to mine environment.
